DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Independent claim 1 of applicant's 11/10/2006 Amendment is patentable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth, including a carrier system configured to transport a sensor along a scanning path; a mid-frame having a slot formed along the scanning path; and a print media detection device positioned below the mid-frame, in which the print media detection device includes a first end and a second end, the first end having a sense surface, and the sensor senses one of a presence and an absence of the sense surface in the slot of the mid-frame as a determination of the depletion of a supply of print media at a print media support.

Independent claim 13 of applicant's 11/10/2006 Amendment is patentable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth, including providing a mid-frame having a slot; providing a sensor mounted on a printhead carrier and locatable over the slot; providing a print media detection device having a sense surface; and detecting with the sensor one of a presence and an absence of the sense surface in the slot of the mid-frame as a determination of the depletion of a supply of print media at a print media support.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
